

Deborah Schwartzkopf  
Statement

I find it rewarding and challenging to make pots people will use. By imparting my own curiosity of form, surface, and ergonomics into my pots, I hope to engage the viewer and encourage interaction. Lines that are defining and soft, elegant and animated, geometric and sensual, architectural and organic build a tension within the form I am interested in—how and what these volumes and lines communicate, capture or abstract. I want to puzzle together these components to underscore function, enhance shape, and awaken a sense of discovery.
